

VA Medical Center Located in West Los Angeles

The recently renovated textile care processing facility considered as one of the most automated in the VA system at VA Medical Center West Los Angeles, CA held dedication ceremonies in January.

HEI has teamed up with R.W. Martin on several laundry projects all over the country and has worked with them on all of the phases of the West LA project. The modernization and full automation of this laundry (45,000 sq. ft.) was completed in phases over the past several years, total cost of this effort was an estimated \$14 million dollars.

The Veterans Health Administration (VHA), the administrative and operational arm of the U.S. Department of Veterans Affairs, is the largest integrated healthcare system in the United States.

The VHA provides care at 1,255 facilities, including 170 VA medical centers and 1,074 VHA outpatient clinics. The VHA serves more than 9 million enrolled veterans on an annual basis

Existing steamless-semi-automated VA laundry facilities that HEI has been involved with are located at VA Healthcare Systems Biloxi MS; Battle Creek, MI and Little Rock, AK. New steamless / automated laundries are currently being planned for VA Brooklyn (St. Albans) NY; VA Bay Pines, FL and VA Brockton, MA.

HEI Update

The transition is complete and Dan Evans is the new president of HEI Engineering Group. We are excited for the future and we are looking forward to working with our current and new clients. HEI will always work to be your go to engineering firm. We will provide quality service, excellent communication, and will meet the critical deadline goals.
