

## Ohio Laborer's Training

The final phase of upgrades were recently completed at the Ohio Laborer's Training Center located in Howard, Ohio.

New hydronic heating & ventilating air-handling units have been installed in the (4) large, indoor all-weather training labs. Each lab is approximately 4,800SF and (3) of the bays have a 25ft ceiling height. HVAC upgrades also included the installation of variable speed Lab exhaust systems, (13) wall mounted, flexible exhaust arms in the Welding Lab and "summer" ventilation fan in the Mechanical Room. Ductless split systems are utilized in the teacher and maintenance staff offices. All remaining pneumatic controls have been replaced with DDC temperature controls.

The Lower Level Break Area boasts a new kitchenette complete with vending machines. Both the Women's Room and Men's Room on the same Lower Level have been completely reconfigured with new Plumbing fixtures.

Sitting on over 100 acres of rolling scenic grounds, the updated training facility is now ready for another 40 years of operation.
